

# Heavy Duty Metal Scraper & Plastic Razor Blades

## Plastic Razor Blades

IBS No. 16401

Plastic Razor Blades are made for safer scraping and cleaning. These blades are sharp while being soft, pliable and forgiving to prevent damage to delicate surfaces. Much safer to use on areas where sharp metal blades can cause damage such as removing caulking from a tub or a bumper sticker from a bumper. And they will never rust or corrode like metal blades do. Dimensions: 3/4" x 1-1/2".

Safe for use on:

- Auto Paint
- Other Plastic Surfaces
- Finished Wood
- Painted Surfaces
- Soft Surfaces

## Heavy Duty Metal Scraper

IBS No. 16400

The Heavy Duty Metal Scraper is formed from sheet metal with stiffening grooves to prevent twisting and is designed to work well with single edge razor blades, but holds a double edge blade as well. Form-fitting handle and sturdy design makes it easy to use.

# INTRODUCTORY OFFER

## Purchase 50 Plastic Razor Blades & Receive a FREE Heavy Duty Metal Scraper!
