

# FLAP BANDS

INTRODUCTORY OFFER - ONLY \$199.95

## FLAP BANDS

### Zirconia Alumina

FLAP BANDS were first developed as a longer lasting, more productive alternative to flap wheels and spiral bands. They are a unique and successful innovation.

- Layered flaps are tightly packed —providing more aggressive stock removal than flap wheels
- Individual flaps wear back evenly, constantly exposing new sharp grains —equates to aggressive stock removal throughout product life which reduces labor costs by removing material faster!
- Flaps affixed to a firm fiber core, giving greater durability than spiral bands
- No seams or splices to rip or tear on sharp edges, which also protects and extends the life of the rubber drum
- Small Flap Bands (1-1/4' to 3-1/2' dia.) provide aggressive stock removal in confined spaces in place of spiral bands, carbide burs, mounted points, flap wheels, plugs and cones
- Excellent for grinding and finishing inside pipes and tubing

# R

### DON'T FORGET

Always use approved NIOSH or MSHA respirators, safety glasses or face shields, gloves and protective clothing when using cut-off wheels and abrasives.

IBS features a wide selection of premium safety products for any application.
