

DRILL & TAP WITH ONE TOOL

SAVINGS UP TO 39% ON SETS

NEW & IMPROVED

- LONGER DRILL POINT
- 3-FLATS ON SHANK

A Combination Drill and Tap Offers Time and Labor Savings by Performing Drilling & Tapping Functions in a Single Step

- 
- 1 Made of **Hi-Molybdenum tool steel** for longer tool life.
 - 2 **3-Flats on the shank** reduces slippage and provides for faster tool changes and alignment in keyless chucks.
 - 3 **Tapered neck** design reduces tap and drill breakage.
 - 4 **Ground threads** and a **plug lead tap** design allows for smooth entry, easy tapping and excellent thread finish.
 - 5 **Black & Gold surface treatment** reduces friction by holding lubricant, providing improved chip removal for cooler cutting and extended life.
 - 6 **Longer drill point** allows for use in thicker materials.
 - 7 **135° Split Point** allows easier starts and higher speed drilling, eliminating the need for a center punch or pilot hole.
